B.O.S. Robotics - Season 6, Issue 1

OUR 2023-2024 SEASON HAS BEGUN!

Our first practice was held on Tuesday, November 7th. We currently have 20 students on the team with 13 returning members and 7 new members. How exciting! This is the biggest team we have had to date.

First Practice, Tuesday November 7th

REGISTRATION CLOSING NOVEMBER 27TH

Registration for the team is still open and won't close until Monday, November 27th. We are open to students in grades 7-12. Register using the link below.

Homecoming Football Game 2023

Sponsor Banquet 2023

RAILS TO TRAILS 2023

If you haven't been keeping tabs on us, we were at Rails to Trails this past summer helping to run the Fun Zone, shooting candy from our robot during the parade, and hosting a robotics event where the general public had the opportunity to try out our robot for themselves.

SPONSORS

With the season beginning, we are looking for sponsors. If you are interested in supporting our team this year, please visit our sponsor page on our website to learn more. You can see our current sponsors at the end of this newsletter. Thanks to everyone who has supported us!

HOMECOMING 2023

Once the school year had begun, we changed out the candy in our robot for t-shirts and brought it out to our school's homecoming football game. The fans got pretty excited to catch some apparel. We plan on bringing it out to some basketball games this winter to provide more crowd entertainment!

NEW COMPETITION PIT

We are excited to announce that we have purchased a brand new PIT structure this season in cooperation with the Boys Scouts as part of Ben Hartshorn's Eagle Scout project. This structure will hold all of our tools and equipment when going to competition.

While we are still determining how we want to organize everything within it, we are very excited to finally have something we can use to make our workspace more efficient at competition.

BUILD SEASON STARTS JANUARY 6TH

The build season officially kicks off on January 6th. That is when the game for this year is announced and we start designing and building our robot.

Follow our social media pages to keep track of our progress this season!
